

JORIM M. ODUO

UI/UX Designer • Web & Product Design • User Research

Umeå, Sweden • Open to Relocation • jorimmoduo.com • linkedin.com/in/j-m-oduo • github.com/jorim-m

Portfolio: [jgrimmoduo.com](#) • Featured Work: [Geometry Labs](#) • [Interactive Journal](#)

SUMMARY

UI/UX Designer with 4+ years of experience designing user-centered digital products and brand systems from research to delivery. Strong in user research methodology, interaction design, and building scalable design systems. Proven ability to translate complex requirements into intuitive interfaces. Backed by measurable outcomes including 40% improvement in task performance, 30% increase in brand recognition, and 85% independent completion rates. Research background in adaptive interfaces and human-computer interaction. Comfortable working cross-functionally with developers, marketers, and stakeholders, and fluent in both design (Figma, Adobe XD) and code (HTML/CSS, JavaScript, React). Master's in Human-Computer Interaction from Umeå University.

EDUCATION

Master of Science in Human-Computer Interaction & User Experience	2023 – 2025
Umeå University, Sweden	
Bachelor of Science in Software Engineering	2016 – 2021
University of Eastern Africa, Baraton, Kenya	

EXPERIENCE

UX Designer & Design Researcher	2023 – 2024
<i>Hela Bio • Remote • Nairobi, Kenya</i>	

- Designed and delivered Geometry Labs, an interactive web application for elementary education; created wireframes, high-fidelity mockups, and a cohesive visual system informed by user research with 15 third-grade students
- Built the complete interface design: defined visual hierarchy, designed interactive components, created layouts for 8+ screens, and established a consistent design language across the product
- Conducted iterative usability testing across multiple rounds, synthesizing findings into interface improvements that achieved 40% increase in task performance and 85% independent task completion
- Translated complex educational requirements into simple, age-appropriate interaction patterns through close collaboration with academic researcher Dr. Rose Nyamwamu
- Owned the full UX process from initial user research and information architecture through production-ready designs and developer handoff

Creative Developer & UI/UX Designer	2021 – 2023
<i>Nawiri Menswear • Nairobi, Kenya</i>	

- Designed and implemented a comprehensive brand identity system for an emerging menswear company, establishing visual design standards, typography, colour systems, and brand application guidelines
- Delivered measurable business impact through design: achieved 30% increase in brand recognition and 20% boost in customer engagement within first year of implementation
- Developed and executed visual design concepts across digital and print touchpoints. Website assets, social media templates, packaging design, and marketing materials
- Optimized design assets for production workflows, creating print-ready files and digital specifications that achieved 90% accurate throughput with manufacturing partners
- Collaborated cross-functionally with marketing and production teams to ensure design consistency across all customer touchpoints

Design Systems & Visual Designer (Freelance)	2025
<i>Readers Are Leaders Book Club • Umeå, Sweden</i>	

- Commissioned to design a complete visual identity and design system for a youth community book club, delivered solo over two months
- Built a scalable design system defining logo variants, typography hierarchy, colour palette with accessibility considerations, and usage rules across digital and print touchpoints
- Established design principles and component guidelines to ensure consistent brand application. Covering spacing rules, alternative applications, and context-appropriate variations
- Created comprehensive design documentation covering identity, typography, colour, imagery, application examples, and do's and don'ts for future use by organizers and partners
- Designed mockups demonstrating system application across context; invoices, merchandise, posters, digital assets, and social media

UX Research Assistant (Master's Thesis)	2024 – 2025
<i>Umeå University, Department of Applied Physics & Electronics • Umeå, Sweden</i>	

- Conducted comprehensive UX research project exploring how digital interfaces can better respond to user needs through real-time input and contextual awareness
- Designed and executed research protocols including user testing sessions, qualitative interviews, and quantitative data analysis to evaluate interaction patterns and user behaviors
- Built and iterated functional interactive prototypes, testing with multiple user groups to validate design decisions and refine interaction models based on systematic feedback
- Applied rigorous research methodology to analyze how interface design affects user experience, synthesizing findings into evidence-based design recommendations
- Collaborated with academic supervisors and technical teams to balance research goals with practical design constraints and implementation feasibility

ADDITIONAL EXPERIENCE

Interaction Designer, XR Design Fellowship	December 2025 – February 2026
<i>Electric South New Dimensions Lab • Johannesburg, South Africa</i>	

- Selected as 1 of 10 designers across Africa for competitive international design fellowship focused on interaction design for emerging interfaces
- Designing adaptive user experience that responds to real-time user input. Defining user flows, interaction states, and experience pacing through iterative prototyping
- Collaborating with international design advisors to refine interaction patterns, validate design decisions through critique sessions, and advocate for user-centered solutions
- Presenting design work to cohort of technologists and receiving structured feedback on interaction design approach, information architecture, and usability considerations

SELECTED PROJECTS

Interactive Reflective Journal – Web Experience Design

UI/UX Design & Front-End Development • 2023 • [View Live](#)

Designed a digital journaling experience from concept to delivery. Created information architecture, interaction patterns, and a complete visual design system. Designed layouts for 10+ journal entry templates, implemented responsive designs, and built custom page-turn animations to balance aesthetic craft with usability.

Readers Are Leaders – Brand Guidelines System

Visual Design & Documentation • 2025

Comprehensive brand guidelines for youth book club covering logo system, typography, colour palette, imagery direction, and application rules. Designed mockups demonstrating system usage across print, digital, and merchandise touchpoints. Delivered as production-ready documentation for client use.

Arduino Pet Plant – Tangible Interface Design

Interaction & Interface Design • 2024 • [View Code](#)

Designed a tangible interface combining physical sensor input with responsive digital UI. Created pixel-art companion interface with light-reactive animations, exploring feedback loops and emotional design principles through simple, intuitive interaction patterns.

SKILLS

Design Tools

Figma (primary), Adobe XD, Sketch, Illustrator, Photoshop, InVision

Development

HTML/CSS, JavaScript, React, Python, Git; comfortable bridging design and engineering

UX & Research

User Research, Usability Testing, Wireframing, Prototyping (Low–High Fidelity), Information Architecture, User Flows, Journey Mapping, Personas, Heuristic Evaluation, Competitive Analysis

Specializations

Design Systems, Interaction Design, Responsive Design, Accessibility (WCAG), Agile/Scrum, Cross-functional Collaboration
